

# Sales Promotion OnTool™ Booster

**The high-vacuum pump that works against atmosphere!  
Innovative. Compact. Powerful.**

Transfer chambers Load-lock chambers EUV lithography Solar cell coating Optical coating Surface finishing Single-chamber systems Transfer chambers Load-lock chambers EUV lithography Solar cell coating Optical coating Surface finishing Single-chamber systems Transfer chambers Load-lock chambers EUV lithography Solar cell coating Optical coating Surface finishing Single-chamber systems

With its performance and compact design, the OnTool Booster is setting benchmarks in vacuum technology. It is characterized by an extremely high pumping speed of 130 m<sup>3</sup>/h and an ultimate pressure of  $< 1 \cdot 10^{-5}$  mbar. The pump can be connected directly to the tool (e.g. load-lock or transfer chamber).

## Promotion packages

We offer 8 different promotion packages consisting of OnTool Booster 150, drive electronics TCP 2000, purge gas valve TVF 005, exhaust valve and connection cable.

## Advantages at a glance

- High-vacuum directly against atmosphere
- For all clean applications
- No backing pump required
- high-vacuum flange in 3 positions
- Can be connected directly to the tool
